**Cross Sectional Shape:**

Round

**Cross Section Outside Diameter:**

0.440 inches

**Conductor Quantity:**

2

**Conductor Form:**

Spiral 2nd conductor

**Special Features:**

Inner conductor od 0.124; dielectric od 0.350; outer conductor od 0.380; jacket od 0.440; dielectric material polyethylene foam per I-p-390, type ii, class I; jacket material polyethylene per I-p-390, type ii, class I, grade 04; frequency range maximum 13.5 ghz; characteristic impedance 50 pm 3 ohms; capacitance nom 23.0 pf ft; velocity of propagation nom 88 pct; dc breakdown 2500 volts; spark test 5000 vrms

**Material:**

Copper 2nd position conductor second conductor

**Material Specification:**

Qq-c-576 federal specification all material responses 2nd position conductor second conductor

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A077a0
