Cross Sectional Shape:

Round

Cross Section Outside Diameter:

0.250 inches

Conductor Quantity:

2

Conductor Form:

Solid 2nd conductor

Special Features:

0.250 in. Super flexible cable; copper clad aluminum core covered with dielectric foam plastic, which is then covered with solid copper and finally coated with a black polypropylene plastic outer covering

Color:

Black 3rd position jacket second group

Material:

Plastic polypropylene 3rd position jacket second group

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
