Cross Sectional Shape:

Round

Tempurature Rating:

200.0 degrees celsius

Conductor Quantity:

2

Conductor Form:

Solid all conductors

Product Name:

K type thermocouple extension wire

Round Conductor Size:

20 awg all conductors

Special Features:

Extt-k-20 is model number. -20 is awg. Extt-k-20-xx xx=length of spool; positive wire chromega (ansi designation kp), negative wire alomega (ansi designation kn)

Color:

Yellow core primary insulation second conductor

Material:

Plastic polytetrafluoroethylene core primary insulation all conductors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
