Cross Sectional Shape:

Round

Tempurature Rating:

200.0 degrees celsius

End Application:

Engine control assembly.

Conductor Quantity:

2

Conductor Form:

Solid all conductors

Product Name:

Thermocouple wire, twisted/shielded

Special Features:

Available in 25, 50 , 100, 200, 500 and 1, 000 foot lengths; ansi color code: positive wire, yellow; negative wire, red; , yellow

Color:

Yellow 1st position jacket

Material:

Plastic fluorinated ethylene propylene core primary insulation all conductors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
