Cross Sectional Shape:

Round

End Application:

1440-01-087-9844

Conductor Form:

Stranded single conductor

Special Features:

Solid single strand; temper: soft or drawn; tin coating

Material:

Copper 1st position serving

Material Specification:

Astm b49 assn standard single material response 1st position serving

Specification Data:

58536 a-a-59551 manufacturers specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
