Cross Sectional Shape:

Round

Electrical Resistance:

5.36 ohms per 1000 feet

Inside Diameter:

0.044 inches single conductor

Outside Diameter:

0.195 inches all conductors

End Application:

00019&72&c&0

Conductor Quantity:

1

Capacitance In Picofarads:

24.5 per foot

Conductor Form:

Solid single conductor

Product Name:

Cable, coaxial

Conductor Cross-sectional Shape:

Tubular solid 1st conductor

Voltage Rating:

1000.0 dc rated working voltage single conductor

Color:

Black core wrap

Material:

Copper core wrap

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
