Cross Sectional Shape:

Round

Electrical Resistance:

50.0 ohms impedance

Outside Diameter:

0.085 inches 2nd conductor

Conductor Quantity:

2

Conductor Form:

Solid, tubular 1st conductor

Product Name:

Standard copper semi-rigid cable

Conductor Cross-sectional Shape:

Tubular braid 2nd conductor

Special Features:

20 ft length; outer conductor material spcw

Material:

Copper 1st position shield foil

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
