Cross Sectional Shape:

Round

Electrical Resistance:

25.0 ohms impedance

Outside Diameter:

0.89 inches and 0.91 inches 1st conductor

Conductor Quantity:

2

Conductor Form:

Solid, tubular 2nd conductor

Product Name:

Standard copper semi rigid cable

Conductor Cross-sectional Shape:

Tubular solid all conductors

Special Features:

length: 20 ft

Material:

Copper core tube

Surface Treatment:

Silver core tube

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
