End Application:

Fire/overheat detection set, f-16 acft

General Description:

Consists of two 18 awg wires per mil-w-25038, both wires connected at one end to receptacle connector per m83723-72r1020n and strain relief per m83723-15s-10, one wire connected at other end to threaded hexagonal pin-end connector, one wire connected at other end to threaded hexagonal socket-end connector, both wires 33.00 in. Long, wires covered with extruded fluorinated ethylene propylene jacket

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
