Body Cross-sectional Shape:

Flat

Overall Length:

12.200 inches

Cross-sectional Height:

Between 0.043 inches and 0.047 inches

Cross-sectional Width:

0.690 inches

Construction:

Solid

Special Features:

31 pins 0.780 in. Lg extend from edge of bus in direction of width measurement, spaced at intervals of 0.400 in. Along length, pins are 0.045 in. Square with pointed tips, total width of bar and pins 1.470 in.

Material:

Copper alloy 260

Material Specification:

Qq-b-613, comp 2, 1/2h federal specification single material response

Surface Treatment:

Tin

Surface Treatment Specification:

Mil-t-10727, type 1 military specification single treatment response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0

Mil-std (military Standard):

Mil-t-10727 spec.
