Body Cross-sectional Shape:

Flat

Overall Length:

Between 3.550 inches and 3.570 inches

Cross-sectional Height:

0.050 inches

Cross-sectional Width:

Between 0.600 inches and 0.620 inches

End Application:

1520-01-043-4949 medevac helicopter

Mounting Configuration:

One 0.322 in. Diameter hole one end; one 0.265 in. By 0.450 in. Mtg slot other end

Construction:

Solid

Special Features:

125 microinch finish all over

Material:

Copper

Material Specification:

Qq-c-576, temper hot rolled, annealed federal specification single material response

Surface Treatment:

Tin

Surface Treatment Specification:

Mil-t-10727, type 1 or 2 military specification single treatment response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0

Mil-std (military Standard):

Mil-t-10727 spec.
