End Application:

F100-pw-200 aircraft engine

Special Features:

length 5.175 in.Nom.; 16 conductors of rolled copper foil per qq-c-576 and kapton-h polyimide film insulation or equiv.; 2 supports 2.96 in. L, 0.40 in. W. Of glass cloth epoxy nema grade fr4; maximum current 1 amp per conductor; continuous operating temp m65 to p300 degrees f; nha electronic engine control 768792

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A509c0
