**End Application:**

F100-pw-200 aircraft engine

**Special Features:**

length 5.175 in.Nom.; 16 conductors of rolled copper foil per qq-c-576 and kapton-h polyimide film insulation or equiv.; 2 supports 2.96 in. L, 0.40 in. W. Of glass cloth epoxy nema grade fr4; maximum current 1 amp per conductor; continuous operating temp m65 to p300 degrees f; nha electronic engine control 768792

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A509c0
