Wall Thickness:

Between 0.119 inches and 0.139 inches

Body Cross-sectional Shape:

Flat

Overall Length:

Between 8.090 inches and 8.150 inches

Cross-sectional Height:

Between 2.340 inches and 2.400 inches

Mounting Configuration:

Item has four holes .234 in. And two holes .272 in. And three holes .312 in. For the purpose of terminating and/or adding electrical components

Construction:

Solid

Material:

Copper

Material Specification:

Qq-c-576, temper hot rolled, annealed federal specification single material response

Surface Treatment:

Tin

Surface Treatment Specification:

Mil-t-10727, type 1 military specification single treatment response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0

Mil-std (military Standard):

Mil-t-10727 spec.
