Body Cross-sectional Shape:

Flat

Overall Length:

2.000 inches

Cross-sectional Height:

0.060 inches

Cross-sectional Width:

0.750 inches

Mounting Configuration:

Two 0.199 in. Diameter holes 1.250 in. C to c in center of bar and 48 0.052 in. Diameter holes 0.100 in. C to c on edge of width and length dim.

Construction:

Solid

Special Features:

125 microinch finish

Material:

Copper

Material Specification:

Qq-b-825, type 1, class 1 federal specification single material response

Surface Treatment:

Tin and lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0
