Body Cross-sectional Shape:

Rectangular

Overall Length:

9.400 inches

Cross-sectional Height:

Between 0.014 inches and 0.020 inches

Cross-sectional Width:

Between 0.720 inches and 0.780 inches

End Application:

1520-01-125-5476 observation helicopter

Mounting Configuration:

One 0.193 in. Diameter hole first end and one 0.253 in. Diameter hole second end; 9.000 in. Lg c to c of hole dia

Construction:

Solid

Material:

Copper

Material Specification:

Qq-c-576 federal specification single material response

Surface Treatment:

Cadmium

Surface Treatment Specification:

Qq-p-416, type 2, class 2 federal specification single treatment response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
