Body Cross-sectional Shape:

L-shape

Overall Length:

2.980 inches

Cross-sectional Height:

0.060 inches

Cross-sectional Width:

0.750 inches

Mounting Configuration:

Four 0.428 in. By 0.642 in. Slots and one 0.108 in. Diameter hole

Construction:

Solid

Special Features:

125 microinch

Material:

Copper

Material Specification:

Qq-c-576, 1/2h federal specification single material response or sae 110 assn standard single material response

Precious Material And Location:

Surface silver

Precious Material And Weight:

0.040 silver grains, troy

Precious Material:

Silver

Surface Treatment:

Silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0
