End Application:

Cable for attack radar antenna

Special Features:

Cable consist of 28 stranded condwire gage 22 awg, length of cable 28.5 inches, 1 branch length 8.50 inches, 3 connectors, p105 conn mrac26sjtc, j107 conn mrac34pj6, p106 conn mrac14sjtc, connector ends shall be molded using black polyurethane per mil-m-24041, cable shall be jacketed using black dacro (1100 denier 2 to 3 ends), applied by using a braiding machine, white filler cord or any other will not be used in the manufacturing of this cable, shields of shielded pairs and triples that are terminated, all shield termination splices to be amade as close as possible to the connectors, all conductors shall be layed up (twisted) helically orcontrahelically on a cabling machine to eliminate backtwist of the cond to provide a round and extra flexible cable core, cable core shall be wrapped with mylar tape per mil-i-831 as a barrier

Fsc Application Data:

Wire and cable electrical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A077a0
