Body Cross-sectional Shape:

Irregular

Overall Length:

16.000 inches

Cross-sectional Height:

0.070 inches

Cross-sectional Width:

0.630 inches

Mounting Configuration:

51 electrical contact pins at 90.0 degrees angle to lg equally spaced 0.300 in. C to c

Construction:

Laminated

Material:

Copper alloy

Material Specification:

Astm b465 assn standard single material response

Precious Material And Location:

Electrical contact surface gold

Precious Material And Weight:

0.040 gold grains, troy

Precious Material:

Gold

Surface Treatment:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0
