Body Cross-sectional Shape:

Rectangular

Overall Length:

7.500 inches

Cross-sectional Height:

0.090 inches

Cross-sectional Width:

2.500 inches

End Application:

An/tsq-129 position location reporting system master station

Mounting Configuration:

Two 0.250 in. Diameter holes, one 0.218 in. Diameter hole, and two 0.281 in. Diameter by 0.375 in. Diameter slots unevenly spaced

Construction:

Solid

Material:

Aluminum

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537p0
