**End Application:**

Programmable armament control set (pacs); f-15a/b/c/d/e/i/s

**Component Quantity:**

6

**Product Name:**

Cable assembly, pacs cp bit tester

**Special Features:**

Cable set consists of six cable assemblies that will interface the pacs c-p connectors j2, j3, j4, j5, j6 and j8 with aircraft connectors 61p-c001b, -c001c and -c001d, -c001e, -c001f and 61p-c001h respectively. The cp is provided with only the necessary inputs required to perform pacs bit; set provides the capability to perform pacs bit without any interface to the aircraft armament wiring; set is stored in bag that is made of hypalon coated nylon fabric that is 22.5" x 6" x 12"

**Reference Data And Literature:**

To 1f-15a-4-6; 33d-1-104

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**
