**Ac Voltage Rating:**

Between 105.0 volts and 135.0 volts

**Mating End Quantity:**

1

**End Application:**

Jet engine test instrument; cab assembly daq

**Current Rating In Amps:**

15.0

**Features Provided:**

Cable assembly and high inrush protection and electric noise suppressor

**Special Features:**

(inavy)suppressor, surge, al; (drawing) surge suppressor, altered(3654as828; cable length: 90in min, 102in max; transient suppression voltage: 330 line-neutral, 330 line ground, 400 neutral ground; noise suppression 20khz, 20db, 1mhz, 40db

**Frequency In Hertz:**

60.0

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A501p0
