Overall Length:

19.000 inches

Overall Height:

1.800 inches

Overall Width:

2.800 inches

Ac Voltage Rating:

120.0 volts

End Application:

5895-01-533-4338, installation kit, electronic equipment

Current Rating In Amps:

15.0

Current Interrupting Capacity:

13.0 kiloamperes

Outlet Type:

Unswitched

Mounting Method:

Rack

Features Provided:

Pilot light and reset button

Special Features:

Input: one 6 ft. 14 awg 3 conductor cord with one nema 15-5 male plug; outlets: six rear mounted nema 5-15rs; surge supression: type single-stage; ul 1449 clamping catagory: 400 volts peak transient voltage; actual clamp voltage: 336 volts peak; fail safety: unit automatically shuts off power to its outlets if surge suppression fails; emi/rfi resistance: up to 40 db; indicator: one front mounted protection led, goes dark when unit's protection circuitry has asbsorbed surge and been destroyed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
