| Overall Length:                                     |
|---|
| 48.000 inches                                       |
| Lamp Base Type Accommodated:                        |
| Medium bipin  |
| Voltage Rating In Volts:                            |
| 120.0 ac  |
| Mounting Method:                                    |
| Surface   |
| Lamp Type Accommodated And Quantity:                |
| 2 fluorescent                                       |
| Special Features:                                   |
| Prismatic lens; f32t8 lamp type; electronic ballast |
| Material:   |
| Plastic acrylic illumination directing device       |
| Shape:  |
| Irregular   |
| Shelf Life:   |
| N/a   |
| Unit Of Measure:                                    |
|   |
| Demilitarization:                                   |
| No  |
| Fiig:   |
| A06300  |
