Overall Length:

19.750 inches

Overall Width:

3.375 inches

Overall Thickness:

0.900 inches

End Application:

Jp5 fueling

Indicator Type:

Light

Panel Material:

Aluminum alloy, qq-a-250/11, alloy 6061, t6

Special Features:

Display module, fault/warning; l2 type lens; green, yellow and red leds; watertight, shock, vibration, moisture, fungus resistant

Special Markings:

Less than 10 min safe clearing time; stuck powder case; full bore; misfire; warning; shield door open; hot gun; lower accumulator dumping; upper accumulator dumping; fault; anti-icing on; mount assigned; firing ordered; firing circuit energized; simulate mode

Surface Treatment:

Paint

Surface Treatment:

Painted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T122-b
