Overall Length:

1.530 inches

Overall Diameter:

0.475 inches

Lens Quantity:

1

Lamp Type Accommodated And Quantity:

1 light emitting diode

Special Features:

Performs in severe environments--designed for use as function indicators on aircraft, test equipment, machine tools--low power use, long life, readily mounted on panel, optional emi screen; optional internal resistor, basic mode with an o-ring panel seal, a option of red, green, and yellow led, a non-diffused or diffused lens type; straight leads and no internal resistor

Style Designator:

Round frame, round lens type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A065a0
