End Application:

A-msg stryker

Product Name:

Light emitting diode

Special Features:

Package white p-lcc-2 , extremely wide viewing angle, wavelength 628nm super red, veiwing angle, lambertian emitter (120 degrees), luminous intensity , wavelength, ir reflow soldering and ttw soldering, optical indicators interior automotive lighting, dashboard backlighting

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
