End Application:

Panel, forward hovering

Voltage In Volts And Current Type:

28.0 dc

Product Name:

Led indicator switch

General Description:

Led type indicator; solderless quick-connect common termination system; dripproof/watertight/splashproof with high impact shock and emi shielding; single circuit, one common; standard design pushbutton cap with one input wire, all 4 quadrants

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
