Overall Length:

12.860 inches

Light Output Rating:

286.000 lumens single rating

End Application:

Lighting fixture 24vdc ww

Emitted Light Characteristic:

White, warm

Wattage Rating:

4.000 watts

Base Style:

Flash bar

Bulb Light Transmission Characteristic:

Translucent

Rated Average Life:

Not rated

Burning Position:

Base down or base up

Product Name:

T-series variable segment directional lighting, 24vdc ww

Special Features:

Output projection 100 degree total angle, housing color metallic grey, white color temperature 3100k warm white, 2x6 tapping screws and adhesive backing form tape included

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A07900
