Inclosure Material:

Metal

Function For Which Designed:

Visible light emitting

End Application:

2430-01-581-8572

Voltage Rating In Volts Per Characteristic:

9.0 source supply voltage and 48.0 source supply voltage

Current Rating Per Characteristic:

4.0 amperes total power dissipation

Power Rating Per Characteristic:

40.0 watts total power dissipation

Color Tone Produced Per Source:

White semiconductor

Product Name:

Floodlight, led

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
