**End Application:**

F-4 aircraft

**Indicator Type:**

Light

**Special Features:**

Dimensions in inches: 5.630 long one end, 4.334 long other end, 2.681 wide one end, 4.380 wide other end; letter stroke width 0.018 wide, 0.021 wide for 0.190 height letters; 0.015 wide, 0.018 for 0.160 height letters; 0.012 0.015 for 0.130 height letters; printed circuit board to be flush to 0.010 above mounting surface; shape of lamp panel per sheet 36; 0.230 thick press collar flush to 0.010 above flush with black surface, typical 4 places; counterbore 0.720 diameter by 0.170 deep, 0.500 diameter hole, typical 5 places light emitting dashed groove 0.015 , 0.025 wide by 0.250 long lines with 0.120 spaces, typical nearside

**Fsc Application Data:**

Aircraft accessory equipment

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T122-b
