End Application:

F-4 aircraft

Indicator Type:

Light

Special Features:

Rated voltage 28 volts ac or dc; rated current tbd, amps at rated volts; lighting 27.95 , 28.05 vdc applied; brightness of markings shall be 0.95 , 1.05 foot lamberts; dielectric breakdown shall not occur upon application of 500 volts rms, 60 hz between either contact 0f p2 and external surfaces of panel for a period of 10 seconds iaw mil-std-202, method 307

Fsc Application Data:

Aircraft accessory equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T122-b
