End Application:

C-17a aircraft

Features Provided:

Adjustable light intensity actuation control

Inclosure Material:

Aluminum

Voltage In Volts And Current Type:

28.0 dc

Product Name:

Encoder; dimming-priority controller system

Special Features:

Linear interface; 2 per system; encoders could be remotely located with up to 150 feet distance.

Material Specification:

Mil-std-1568 military standard 1st material response and mil-std-1587 military standard 2nd material response

Style Designator:

Dimmer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07600

Mil-std (military Standard):

Mil-std-1568 spec.
