Voltage In Volts And Current Type:

28.0 dc

Product Name:

Led pushbutton indicator

Special Features:

Solderless quik-connect common termination system; unsealed with emi shielding; two buttons with one on top of the other; last 5 digits

indicate customer artwork part number description; indicator only

Specification Data:

81349-mil-prf-22885f government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900

Mil-std (military Standard):

Mil-prf-22885f spec.
