Voltage Rating In Volts:

28.0 dc

Special Features:

Light assembly designed for application capatability with searchlights thatmeet requirements of mil-I-81174/2b-2; light assembly is a dual mode searchlightused where nvgs are required; searchlight used an instant start ballast and ahot restrike; initial light illumination occurs instantaneously; full light output with 5 to 10 seconds; light maybe operated on the ground or for in flight operations

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A06300
