Overall Length:

3.125 inches

Overall Diameter:

1.125 inches

Light Function:

Position and signal

Voltage Rating In Volts:

3.0 dc

Product Name:

Light infared emergency triage (e/t) patient status

Special Features:

Triage emergency light; multiple synchronized color combinations, including infared (ir); used for emergency triage conditions, primarily for patient collection actions; battery type: replaceable 3 volt cr2 lithium; weight: 43.3 g (with lanyard, no packaging); shape: cylindrical w/ tapered end, cone shaped; size: 3.125 in x 1.125 in; packaged dimensions: 3.5 in x 1.375 in; light source: leds (approx. 100, 000 hrs life); light colors: infared, red, green, blue; battery life: 72-over 200 hours (dependent on battery make and color/mode selection); operating temperature: -30 to +130 degrees f; water resistant, pressure tested to 66 ft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
