## NSN 6350-00-441-3555

Electrical Bell - Page 1 of 2

Overall Height: 1.250 inches

0.125 inches

**Mounting Hole Diameter:** 

View Online at https://aerobasegroup.com/nsn/6350-00-441-3555

**Center To Center Distance Between Mounting Holes:** 

2.250 inches
Mounting Hole Quantity:
2
Current Type:
Ac
Frequency Rating:
60.0 hertz
Overall Diameter:
3.000 inches
Mounting Method:
Hole
Inclosure:
Included
Design Type:
Any acceptable
Sound Chamber Type:
Any acceptable
Sound Chamberdiameter:
3.000 inches
Sound Chamberwidth:
Sound Chamberwidth: 1.000 inches
1.000 inches
1.000 inches  Tone Adjustability:
1.000 inches  Tone Adjustability:  Nonadjustable
1.000 inches  Tone Adjustability:  Nonadjustable  Voltage In Volts And Current Type:
1.000 inches  Tone Adjustability:  Nonadjustable  Voltage In Volts And Current Type:  115.0 ac
1.000 inches  Tone Adjustability:  Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:
1.000 inches  Tone Adjustability:  Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0
1.000 inches  Tone Adjustability:  Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0  Material:
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0  Material:  Brass and steel
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0  Material:  Brass and steel  Material:
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type: 115.0 ac  Voltage In Volts: 115.0  Material: Brass and steel  Material: Copper alloy and steel
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0  Material: Brass and steel  Material: Copper alloy and steel  Surface Treatment:
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type: 115.0 ac  Voltage In Volts: 115.0  Material: Brass and steel  Material: Copper alloy and steel  Surface Treatment: Any acceptable
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type: 115.0 ac  Voltage In Volts: 115.0  Material: Brass and steel  Material: Copper alloy and steel  Surface Treatment: Any acceptable  Shelf Life:
1.000 inches  Tone Adjustability: Nonadjustable  Voltage In Volts And Current Type:  115.0 ac  Voltage In Volts:  115.0  Material: Brass and steel  Material: Copper alloy and steel  Surface Treatment: Any acceptable  Shelf Life: N/a
