End Application:

An/fsq-15 (v) arts

Alarm Type:

Buzzer

Monitor Type:

Lamp

Supplementary Features:

Alarm and transfer panel provides comparisons of the tcg, oscillators, and pulse rates to the c&s processor; the audio alarm and light emitting diode indicate error detection to the controller; the alarm and transfer panel consist of level detectors, bite error detectors, phase error detectors, oscillators and alarms, and power supply

Fsc Application Data:

Alarm, signal security systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T104-b
