Overall Height:

63.0 millimeters

Overall Diameter:

105.0 millimeters

End Application:

Refr

Usage Design:

For heat detection in dry spaces

Alarm Type:

Indicating light

Monitor Type:

Lamp

Product Name:

Heat detector

Special Features:

An analogue addressable heat detector; the address of the detector is set by a dip-switch; voltage is 28; working voltage is 19-30; ambient temperature is -10 degrees c to +70 degrees c; protection class (ip) is 22; detector is made of white plastic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T104-b
