End Application:

An/tsq 19 (trojan spirit)

Unpackaged Unit Width:

22.4 inches

Unpackaged Unit Height:

16.3 inches

Container Type:

Case

Unpackaged Unit Weight:

140.0 pounds

Product Name:

Assembly transit case-ac system

Special Features:

Depth is 34 inches

Functional Description:

R3g is a mobile mess network supporting immediate response intelligence system personal exploitation devices (iped's) or hand-held devices wirelessly. R3g consists of fixed nodes, vehicle based nodes, a centcom forward server, and hand-held biometrics collection devices called secure electronic enrollment kits (seek ii). The seek device transmits its biometric profile data to the vehicle node via 3g cellular network provided by the vehicle's network in a box radio. The vehicle node uses another radio (qnt), providing backhaul communication, to send this data from the vehicle to a 'regional' fixed site. The fixed sites send and receive their information via npr to (and from) the centcom forward server (cfs) which houses all of these profiles. Watch lists are updated through the cfs via multiple sources. The information flow between the handheld and the cfs is two way.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
