Physical Form:

Powder

Protective Storage Feature:

Antineoplastic drug

Active Medicament Medicinal Strength:

200.000 mg anhydrous cyclophosphamide active ingredient

Features Provided:

Sterile

Primary Container Type:

Vial

Warning And Caution Statements:

Chemotherapeutic agent; handle with care

Primary Container Content Quantity:

200.000 milligrams active ingredient

Total Primary Container Quantity:

12

Product Name:

Cyclophosphamide for injection usp 200mg vial 12s pg

Special Features:

Vial w/not less than 15 ml of volume; note: d

Therapeutic Equivalent:

Neosar by adria labs., inc.; cytoxan by bristol labs., inc.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A34300
