Active Medicament Medicinal Strength:

Each 5 ml contains 0.83 mg calcium chloride, 4.02 mg dipotassium phosphate, 0.293 mg magnesium chloride hydrated, 2.2 mg monopotassium phosphate, 3.1 mg potassium chloride, 0.255 mg sodium chloride, 214 mg sorbitol, and not more than 2 ppm fluoride present as sodium fluoride

Primary Container Type:

Bottle, plastic atomizer

Primary Container Content Quantity:

180.000 milliliters

Special Features:

Contains preservative and sufficient quantity of carboxymethylcellulose to adjust viscosity

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A45100
