Unit Package Quantity:

12

Features Provided:

Bandage, adhesive, nonsensitized

Usual Dose:

0.2 mg released per day for 7 days

Product Name:

Clonidine transdermal system 5mg adhesive bandage 12s

Overall Strength In System:

5 mg clonidine active ingredient

Exterior Container Weight:

1.00 pounds

Exterior Container Cubic Measure:

0.066 cubic feet

Exterior Container Quantity:

6

Special Features:

A transdermal reservoir system w/a microporous polypropylene membrane that controls the rate of delivery of clonidine from the system to the skin surface; w/12 adhesive overlays

Unit Of Issue Cube:

0.0106 cubic feet

Unit Of Issue Weight:

0.188 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510w0
