Storage Temperature Range:

+2.0/+8.0 degrees celsius

Product Name:

Protease xxv for enzyme-induced epitope retrieval

Special Features:

Each component is stable for 18 months; always use fresh protease xxv solution; discard the unused solution

Functional Description:

Sa digestive enzyme commonly used for unmasking of epitopes in formalin-fixed, paraffin-embedded immunohistochemical procedures; very effective in improving the immunoreactivity of certain antigens in formaldehyde fixed tissues

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
