Product name:
Gelfilm
Special Features:
Gelfilm sterile ophthalmic film for use in ocular surgery. Sterile envelopes, six per carton. Gelfilm sterileophthalmic film is absorbable gelatin f
ilm approximately 0.075 mm thick and is designed for use as an absorbable gelatin implant in neurosurgery and thoracic and occular
surgery. In the drysta te, absorbable gelatin film has the appearance and texture of cellophaneof e quivalent thickness; when moistened, it
assumes a rubbery consistency and can be cut to desired size and shape and fitted to rounded or irregular surfaces.
