Product Name:

Gelfilm

Special Features:

Gelfilm sterile ophthalmic film for use in ocular surgery. Sterile envelopes, six per carton. Gelfilm sterile ophthalmic film is absorbable gelatin film approximately 0.075 mm thick and is designed for use as an absorbable gelatin implant in neurosurgery and thoracic and ocular surgery. In the dry state, absorbable gelatin film has the appearance and texture of cellophane of equivalent thickness; when moistened, it assumes a rubbery consistency and can be cut to desired size and shape and fitted to rounded or irregular surfaces.
