Color Location:

Features Provided:

Sterile

Product Name:

Evarrest fibrin sealant patch, hemostatic dressing, 2 by 4 inch, 2 ea per box

Special Features:

Absorbable fibrin sealant patch for use with manual compression for control of bleeding during adult liver surgery and soft tissue bleeding during open retroperitoneal, intra-abdominal, pelvic, and non-cardiac thoracic surgery when control of bleeding by standard surgical methods of hemostasis is ineffective or impractical; topical use only, do not apply intravascularly; single use; apply to bleeding site only; contains human fibrinogen, human thrombin, and oxidized regenerated cellulose, polyglactin 910, which adheres to bleeding surfaces; hemostatic solution stops problematic bleeding and encourages rapid and durable clot formation with the patch; registered with the fda to control bleeding from open wounds and body cavities; active side is powdery, non-active side has an embossed wave pattern; 2 inch by 4 inch (5.1 cm by 10.2 cm); individually packaged (2) per box
