Body Material:

Plastic

Filtering Surface Area:

2.0 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Capacity Accommodated:

Between 122.0 milliliters and 153.0 milliliters

Dialyzer Element Form:

Plate

Membrane Thickness In Microns:

10.5

Special Features:

Multiple layers (36 for blood, 72 for dialysate); cuprophan membrane; 9.5 ultrafiltration in vivo; priming volume 153 ml; 8/box

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T117-e
