Body Material:

Cuprophan

Filtering Surface Area:

1.4 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Dialyzer Element Form:

Coil

Special Features:

Consists of a single tubular cuprophan membrane, supported by triangular strand-asymmetrical mesh screening, w/dialyzing fluid spout

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T117-e
