**Body Material:**

Cuprophan

**Filtering Surface Area:**

1.4 square meters

**Sterility:**

Sterile

**Disposition After Initial Use:**

Disposable

**Dialyzer Element Form:**

Coil

**Special Features:**

Consists of a single tubular cuprophan membrane, supported by triangular strand-asymmetrical mesh screening, w/dialyzing fluid spout

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T117-e
